

The TPS Outsourcing Solution

In today's environment of ever-changing market requirements and tightening regulation, tax relief on international investments is proving more and more difficult.

The **Tax Processing Services (TPS)** platform is the market's first comprehensive corporate action and tax relief outsourcing solution for financial intermediaries. Designed and developed in collaboration with leading financial institutions, TPS puts the clients' needs first, by providing powerful features and capabilities that help them navigate the complexities of corporate actions and tax relief, whilst streamlining operations, increasing efficiency and reducing operational risk.

Acupay: Financial technology solution provider specialized in cross-border withholding tax

Acupay's expertise in securities processing and international tax relief, combined with our unique business approach, has enabled us to provide efficient solutions to difficult, and often previously unworkable, operational and mechanical problems in securities issuances and international investment.

Since 2005, Acupay's innovative technology has been employed by over 2,200 financial intermediaries, including some of the largest custodian banks, on the behalf of over 1.1 million investors located in 180 countries.

Case Study: TPS as an Outsourcing Solution for a major European CSD

A major European CSD, participant of T2S, pioneered the use of Acupay’s innovative outsourcing solution, TPS. Launched in August 2016, TPS instantly appealed with its unique features, such as beneficial owner profiling with electronic and original documentation management, real-time transaction processing and tax computation and systematic reconciliation of income events with immediate or post-payment tax relief. The TPS-powered fiscal service enabled the CSD to expand its current suite of services and attract non-resident intermediaries on a direct relationship basis.

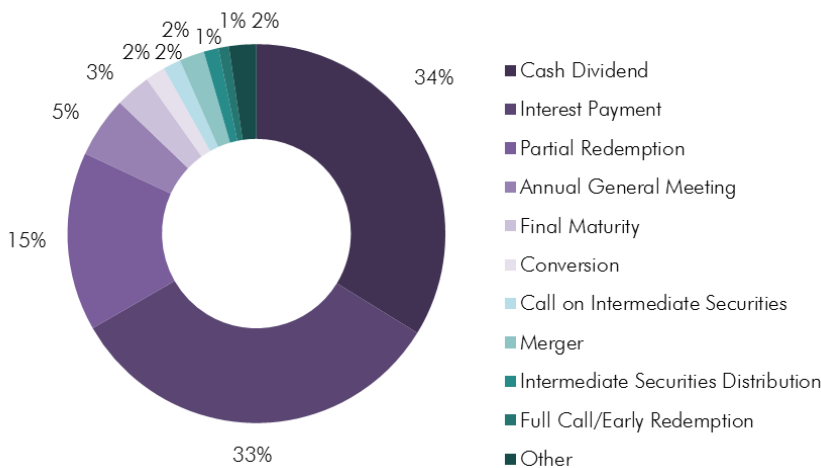

“TPS is playing a key role in our success story in the fiscal services solutions. Our mission to process tax bookings seamlessly and to provide state-of-the-art reporting solutions also relies on this innovative and secure platform.”
