

Acupay

Acupay is a financial technology solution provider specialized in cross-border withholding tax

Acupay's expertise in securities processing and international tax relief has enabled us to provide efficient solutions to difficult, and often previously unworkable, operational and mechanical problems in securities issuances and international investment.

Acupay **acts as Tax Certification Agent** on all direct Italian Legal Decree 239-compliant bond issuances directly in DTC, totalling \$31,3billion of debt.

Acupay has also helped issuers in Spain, Belgium, Israel, Turkey and other jurisdictions to issue and distribute bonds globally whilst allowing investors to obtain tax relief.

Problems for the issuers

Historically, many issuers were forced to use SPVs to circumvent the impact of tax laws.

Legislative Decree 239, introduced in 1996, allows for direct issuances into foreign domestic markets, but requires tracking of the holders of the debt.

Most local CSDs do not currently offer complete and automated tax services.

The Acupay Solution

- Certification and tracking system of beneficial owner holdings, tax statuses and documents via back office custodial network in compliance with Italian tax regulation.
- Direct access to cross-border funding and capability to target large domestic financial institutions.
- Reach investors that typically do not hold direct or indirect accounts at Euroclear or Clearstream.
